

SWEETER FOR EVERYONE TREATMENT PROTOCOL

- Babies at risk of neonatal hypoglycaemia
- Preterm <37
- Small for gestational age, birth weight <2.5kg
- Large for gestational age, birth weight >4kg
- Gestational diabetes
- Intrapartum asphyxia, resuscitation at birth
- Potential for sepsis (GBS)
- Persistent hypothermia
- Maternal use of beta blockers
- Any baby thought to be at risk of hypoglycaemia for clinical reasons (eg not feeding well, possible symptoms)

CAUTION: A maximum of 6 doses of 40% dextrose gel can be given in 48 hours
